

## PageOne Premier Text communications on the move

### Features and Benefits

The PageOne Premier Text can receive messages of up to 240 characters in length and has a 4 line LCD, displaying 80 characters at a time. The pager has 63 pre-set messages already programmed in it. A numeric code sent by the message sender will make the appropriate message appear on the pager.

### Greater Versatility

For absolute discretion the PageOne Premier Text can be programmed to alert you silently to an incoming message or you can choose from a wide selection of audible alerts.

### Cost Effective

The PageOne Premier Text is available on a range of different tariff options. These have been designed to enable you to select the most cost effective solution for your specific paging application.

### Faster Communication

You can rely on your message coming through in seconds because PageOne uses advanced satellite technology to send your message across the country and through to you.

### Easy To Use

To send a message, callers simply dial the pager number and dictate their message to a Call Centre Operator who will send it to the pager. Alternatively messages can be sent direct from PC's or terminals or by using one of PageOne's easy to use Direct Access packages.

### Unsurpassed Back-Up

You need never worry about things going wrong, PageOne makes a point of good service - whether you need a replacement, repair or simply want to know how the system works or how far it reaches - just call our Customer Services department on 08700 555 300.

In addition to the new features, the standard paging facilities are available, for example, a variety of alerts, message lock and erase, alarms, low battery indicator and backlit display.

### Product Features:

- 80 character, 4 line LCD display with backlight
- 3200 character memory
- Holds messages of up to 240 characters
